How to take this course

REST APIs with Flask and Python

Welcome to "how to take this course". This is a short yet important lecture!

Throughout the course, I would always recommend you **code along with me**. Programming is the best way to make sure everything sticks!

The next lecture contains a self-assessment. After completing it you may be able to skip some of the content if you already know it.

I'll see you in the next lecture!

Kind regards,
Jose—your instructor
